

The MERG Exhibition Stand

Here is a photo of part of MERG's Exhibition stand taken at a recent exhibition.

Click on the image to see a larger version.

At the top of the display in the foreground is the **Hysteresis Loop** so called for its resemblance to a hysteresis graph. Below this is the **Shuttle kit demo**. These two displays are part of what is affectionately known as the Flower Stand. They are here placed on top of two self supporting cabinets, the nearer one demonstrates **Super Bloc*** and **RFID**. The farther cabinet demonstrates the **New DCC System** and **CBUS System**.
[Return to main Glossary index](#)

*The photos show the BC3 demo, traction is being replaced by **ATC in Shuffle mode**
