

MERG related courses

If you know about any other relevant courses not listed here, please add them.

Note that you do not have to be a MERG member to come on these courses.

These courses are organised by a group of MERG members for the benefit of other MERG members and railway modellers in general. Your booking is directly with the course organisers, not with MERG itself.

All bookings for courses that were postponed over the last couple of years will be honoured for future courses.

If you already have a booking for any course, you will be contacted directly by email about the arrangements and dates.

The 2021 dates below are confirmed, with the venue already booked,

The dates for 2022 are provisional, awaiting confirmation from the venue.

Missenden Railway Modellers Autumn weekend - 8-10th October 2021

The Autumn Missenden Railway Modellers Weekend is back as a face to face training weekend.

The weekend this year includes courses on Locomotive kit construction, detailing ready to run rolling stock, track building and laying, weathering and "All about DCC", the latter course taught by MERG member Pete Brownlow.

Bookings are open, see the website for more details and to book:

JMRI Part 3 - Automation with scripts and the Dispatcher

6th-8th November 2021 (Rushden)

This is part 3 of our three JMRI courses.

This is a weekend course for JMRI power users who want to take it on to partial or full automation.

The course will take place in the “Goods Shed” meeting room at the Rushden Transport Museum & Railway, Rushden Station, Northamptonshire.

As a pre-requisite you should be a fluent JMRI user, having attended our Introduction and part 2 courses, or be comfortable with setting up panels in the Layout Editor, blocks and train detection, pathing and signalling.

Click below for more details:

Introduction to CBUS

Provisional 2022 date: 12-14th March 2022

The course will take place in the “Goods Shed” meeting room at the Rushden Transport Museum & Railway, Rushden Station, Northamptonshire.

For those just starting out in CBUS, this weekend course will take you from first principles through building CBUS kits to setting up CBUS operations.

This course assumes no previous knowledge of CBUS.

Click below for more details:

More CBUS

Provisional 2022 date: 23rd-25th April 2022

This course is for those already familiar with the basics of CBUS, who would like to take it further.

Particular emphasis on configuring CBUS in FLiM and using the universal CANMIO firmware.

The course will take place in the “Goods Shed” meeting room at the Rushden Transport Museum & Railway, Rushden Station, Northamptonshire.

This course assumes that you have attended the Introduction to CBUS course, or that you already have a good understanding of the basics of CBUS, building modules and getting them working.

Click below for more details.
