

JMRI Part 3 - Automation with scripts and the Dispatcher

22nd to 24th October 2022 (Rushden)

This is part 3 of our three JMRI courses, to cover train automation.

The course will take place in the "Goods Shed" meeting room at the Rushden Transport Museum & Railway, Rushden Station, Northamptonshire.

In addition to the weekend course, there is an optional follow-on practical workshop day on the Monday. This day will be a practical workshop session for you to apply the knowledge learnt over the weekend, with the assistance of the tutors. If you have your own layout hardware that you want to work on with JMRI, we can also assist with that on the Monday.

This course will take you through the various things you need in place to run trains automatically, and then cover methods of automatic train running with JMRI.

This is a weekend course for those already familiar and competent with JMRI.

As a pre-requisite you should have attended our first two JMRI Panel Pro courses, or be fluent with drawing a layout diagram in the Layout Editor, setting up turnouts & sensors, turnout feedback, linking from a Layout Editor Panel to the physical layout, use of blocks, train detection and tracking, creation and use of signal masts and signal mast logic.

We will be using the JMRI Panel Pro Layout Editor throughout.

Topics covered will include:

- Automation pre-requisites
- Automation with scripting
- YAAT - Yet Another Auto-Train
- Automation using dispatcher
- Sections and transits
- Manual and auto-trains
- Transit actions
- Speed calculations
- Stopping trains at the right place
- Creating a timetable/sequence
- Driving dispatcher from scripts
- Mixing manual movements with auto-trains
- Locomotive speed profiling

This will be a practical course so that you can have a go on your own computer as we go along.

Bookings are open.
