Area Group Coordinator

Allan Geekie M5173 - email address: vag@merg.org.uk

How It Works

This group now uses Zoom to conduct a group meeting from member's homes or workplaces. It was formed in October 2018 to assess the usefulness of video conferencing technology.

The calls last one hour and to participate, members need a mobile phone, tablet or a PC / Mac with a camera and microphone.

In order to join the group you need to send an email to Allan at vag@merg.org.uk.

Calls are scheduled in advance and are held on the second and fourth Tuesday of each month at 11:00GMT or 10:00BST. Agendas are agreed in advance.

When it is time to start a call, a voice and video conference is opened up which has thumbnails of each video participant and any shared presentations or desktops. The call leader facilitates the call and the discussions and tries to get through the agenda in the agreed time. Zoom has two views available. The first is the speaker view which selects the video stream from the person speaking. The second is Gallery view which shows streams from all participants. These streams are larger than the thumbnails.

Members are participating from:-

- Australia
- Canada
- Iceland
- Ireland
- UK
- USA.

Members can access the presentation material [here](#).

If you would like to try out Zoom, then there is a test meeting service where you are the only

participant and you can experiment with the various options available.
