

INTRODUCTION TO CBUS WEEKEND COURSE

Here are the details for the Introduction to CBUS course which will take place in the “Goods Shed” meeting room at the Rushden Transport Museum & Railway, Rushden Station, Northamptonshire., over the weekend **26th to 29th March 2021.**

Please note that if you already have a booking for the 2020 course which could not take place, your booking will be honoured for this course in 2021, you do NOT need to book again. Please just let us know that you will be coming, so we can keep track of numbers.

Arrivals are from 4pm on Friday afternoon 26th March, the course will run to about 5pm on Sunday afternoon 28th March. For those who arrive on Friday evening, you will have a chance for informal discussions with the tutors, setting up ready for kit building, and getting the FCU CBUS configuration software installed on your laptops.

On each full course day, the venue will be open from about 8am for tea, coffee and bacon butties, with the course starting at 9am on each day.

We also have an optional follow-on practical workshop day on Monday 29th March. This will be a practical workshop day for you to apply the knowledge learnt over the weekend. You can work on whatever you wish, with assistance from the tutors, such as building and setting up CBUS modules.

Note that there will still be practical sessions during the main weekend, the all day Monday workshop is an additional option.

Your course tutors will be Pete Brownlow and Chris Noble. We will limit numbers to a maximum of 12 to make sure everyone gets good value from the weekend.

This course assumes no previous knowledge of CBUS.

If you are already comfortable with CBUS concepts, setting up CBUS in SLiM and FLiM and the FCU program, this is probably not the course for you. A "More CBUS" course on more advanced topics is scheduled for 24th to 26th April 2021.

Topics covered will include:

- Introduction to CBUS principles
- CBUS theory and practice - use with DC or DCC
- The various CBUS modules that are available – including latest designs
- Building and testing CBUS kits – practical workshop sessions
- Wiring and power supply arrangements for CBUS
- Setting up CBUS using SLiM and FLiM.
- Connecting CBUS to a computer
- Using the FLiM Config Program (FCU)
- Setting up the modules, teaching events
- Building control panels for CBUS
- CBUS in action
- The MERG DCC system – integrating with CBUS

The course fee will be £115, which includes lunch on Saturday and Sunday, as well as Bacon butties each morning, tea/coffee and biscuits with cake in the afternoon.

The fee for the Monday workshop day is £54, including morning butties and lunch etc as above.

To book your place, please fill in the enrolment form and email to eastmids@merg.org.uk

What to bring

If you already have some CBUS modules, either already built or still in their kit bag, please bring them with you.

We will have a good selection of CBUS kits at the course for purchase during the weekend. If you know what you want in advance, to be sure of being able to get what you want, you may wish to order any kits you require in advance from the MERG kit locker.

If you order kits no later than 12th March, you can specify collection at the CBUS course and we will arrange for them to be brought to the course for you. After that date, you will have to pay the usual postage and have the kits dispatched directly to you, or hope that we have them in stock at the course.

Suggested tools for electronic kit assembly are as follows:

- Soldering iron (25-40W temperature controlled with interchangeable bits is best)
- Solder – Tin/Lead 60/40 resin cored, about 0.7mm or 22SWG size (note that lead free solder such as that sold by Maplin is much more difficult to use)
- Solder sucker and/or de-solder braid (for when you get it wrong!!)
- Small side cutters
- Wire strippers
- Small long nose pliers
- Tweezers
- Small screwdrivers
- Bendy Jig (available from the MERG kit locker in the tools section)
- Work light, such as an anglepoise or similar
- Optivisor or magnifier according to your preference
- Multimeter if you have one

and any other favourite tools you have for electronic construction.

CBUS can be set up using a computer, so if you would like to have a go at doing that yourself, then bring a laptop with you. The configuration program, called FCU, requires Windows and will run on versions from Windows XP to Windows 10.

If you do not have one or two items on the list, don't panic because there is always the possibility of borrowing from the course tutors or other course members. If you are not sure about the tools you need to bring, please get in touch.

The Course Venue

**The Goods Shed
Rushden Station
John Clark Way
Rushden
Northamptonshire
NN10 0AW**

Rushden Historic Transport Society (RHTS) are based at the restored Rushden Station. They recently acquired the historic goods shed across the road, it having previously been in use as a council depot, which now forms part of the Rushden Transport Museum and Railway. See www.rhts.co.uk for more information.

The pictures are from a recent “More CBUS” course at Rushden Transport Museum

Rushden Transport Museum is signposted from the A6 Rushden bypass and parking is available directly outside:

If you would like to come by train, the nearest main line railway station is Wellingborough. We can arrange to collect you from the station.

The course room is on the ground floor and has a ramp for step free access if required.

If you need more information about accessibility, please get in touch.

Local Accommodation

The course fee does not include overnight accommodation so, unless you live locally enough to travel each day, you will need to book your own hotel.

Here is a list of some local hotels. This list is not exhaustive, and was compiled pre-Covid 19, so some things may have changed and the inclusion or not of a hotel on this list does not imply any particular recommendation or otherwise.

You can also try online booking websites such as trip advisor, laterooms.com, booking.com and trivago.co.uk. Recent course attendees have also had good results using airbnb.com.

Travelodge Wellingborough Rushden

**A45 Eastbound,
Rushden,
Northamptonshire
NN10 6AP**

Tel: 08719 846115
www.travelodge.co.uk

About 1.7 miles from the course venue, however please note that it is only accessible from the Eastbound carriageway of the A45, so when returning from the course, you have to travel a couple of miles on to the Wellingborough junction and then back again to get to it.

The Stanwick Hotel

**West Street,
Stanwick,
NN9 6QY, United Kingdom**

Tel: 01933 622233
www.thestanwickhotel.co.uk

About 3.3 miles from the course venue

Redlands Farm Bed & Breakfast

**Redlands Farm,
West Street,
Stanwick,
NN9 6QZ**

01933 355169
www.redlandsenterprises.co.uk

About 4 miles from the course venue. We have received very good reports from those who stayed here for the last course at Rushden.

Premier Inn Wellingborough

**London Road,
Wellingborough,
Northamptonshire
NN8 2DP**

Tel: 0871 527 9144
www.premierinn.com

About 4.6 miles from the course venue

The Hind Hotel

**38 Sheep Street
Wellingborough
NN8 1BY**

Tel: 01933 222827
www.facebook.com/TheHindHotel

About 5.5 miles from the course venue

IBIS Wellingborough

**Enstone Court
Wellingborough
NN8 2DR**

Tel: 01933 228333
www.ihg.com

About 5.8 miles from the course venue.

Millhouse Hotel

**Mill Road,
Sharnbrook,
MK44 1NP**

Tel: 01234 781678
www.millhouse-riverside.co.uk/

About 6 miles from the course venue
